

Research Card Appendix

Warning, this is quite long, but only because I go into extreme detail for each research card!
You really only need to read a specific section if you use that specific card in your game.

While reading this appendix, you will come across words like rank, value, high, low, strong, and weak. These words are used in the following context:

Rank: This relates to a card's order or position relative to the other cards. There are only two card ranking orders (**9 High** and **1 High**).

When **9 is High**, the card ranking is (**High**) 9 8 7 6 5 4 3 2 1 (**Low**).

When **1 is High**, the card ranking is (**High**) 1 2 3 4 5 6 7 8 9 (**Low**).

Value: This relates to the number on a card. Note: Even if the card ranking is changed, a card's value does not change. For example, when "1 is High", 9 is the lowest rank, but its value is still 9.

High/Low: This goes hand in hand with **Rank** and describes whether a card is higher or lower than another card. For example, if "9 is High", a 7 is higher than a 2 and a 3 is lower than a 4. On the other hand, if "1 is High", a 7 is lower than a 2 and a 3 is higher than a 4.

Strong/Weak: This relates to the strength of a card. In almost all cases, a card that has a higher rank than another card is also stronger than that card (while a lower rank is weaker). However, there are two instances where a card can be stronger or weaker than another card, regardless of rank or value.

- 1) **A trump suit card is stronger than all non-trump suit cards.** For example, if "9 is High, Spades are trump", the 2 of Spades is stronger than the 9 of Hearts. *This also means a non-trump card is weaker than a trump card.*
- 2) **All led suit cards are stronger than all off-suit (non-led & non-trump) cards.** For example, "9 is High, Spades are trump", the 5 of Diamonds was led followed by the 8 of Hearts. The 5 of Diamonds is stronger than the 8 of Hearts. *This also means an off-suit card is weaker than a led suit card.*

Deck A - Trick Play

(IYCFY = If You Can't Follow You)

★1A) Must Follow / May Beat

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player. If a follow player cannot follow the led suit, they may play any card.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Example: Cindy leads with the 5 of Hearts. Sarah must follow suit and play a Heart. Sarah has the 3 and 7 of Hearts and can play either card. She plays the 3 of Hearts.

★2A) Must Follow / May Beat / IYCFY Must Clubs

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Must Clubs: If a follow player does not have a card in hand that matches led suit, they must play a Club suit card. If they do not have a Club, they may play any card.

Example: Demetri leads the 6 of Spades. Cindy must follow suit and play a Spade. However, Cindy is out of Spades and has the 2, 3, and 7 of Clubs. Therefore, she must play a Club, of any rank. She plays the 2 of Clubs.

★3A) Must Follow / May Beat / May Trump*

**Ignore 'May trump' if the card from Deck C does not have a trump suit*

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

May Trump: A follow player may play a card of the trump suit, even if they have a card that matches the led suit.

Example (Spades trump): Sarah leads the 9 of Diamonds. Demetri has the 5 and 8 of Diamonds as well as the 2 of Spades. He must follow suit and play either one of his Diamond cards. However, Demetri may trump by playing the 2 of Spades, even if he has a Diamond in hand. He decides to play the 2 of Spades.

★4A) Must Follow / Must Beat / IYCFY Must Trump*

**Ignore 'Must trump' if the card from Deck C does not have a trump suit*

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

Must Beat: Follow players must play a card that is stronger than the strongest card in the trick. If they cannot, they may play any card.

Must Trump: If a follow player does not have a card in hand that matches the led suit, they must play a card of the trump suit, if possible.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Must Beat Example (9 High): Cindy leads with the 5 of Hearts. Sarah must follow suit and play a Heart. Additionally, Sarah must play a 6 of Hearts or higher, if she has one. Sarah has the 3 and 9 of Hearts. Therefore, she must play the 9.

Must Trump Example (9 High, Spades trump): Cindy leads the 5 of Hearts. Sarah must follow and must beat by playing a 6 of Hearts or higher. However, Sarah is out of Hearts but has Spades in hand. Therefore, she must play a Spade, of any rank.

Note: You must always check for the **must follow** rule before checking the **must beat** and **must trump** rules. See MF, MB, MT flowchart for more specifics if needed.

Example (9 High, Spades trump): Cindy leads the 5 of Hearts. Sarah follows with the 9 of Hearts. Demetri has the 2 of Hearts, 7 of Hearts, and 4 of Spades in hand. Because he still has Hearts in hand he must play one of them. They are all weaker than Sarah's 9 of Hearts, so Demetri can play either one. Demetri cannot play the 4 of Spades (trump) because he must follow the led suit first and foremost.

★5A) Must Follow / May Beat / IYCFY Must Shortest

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Must Shortest: If a follow player does not have a card in hand that matches led suit, they must play a card from the suit that they have the fewest cards in (aka shortest suit). If there is a tie between suits, they may pick which suit to play.

Example (1 High): Demetri leads the 1 of Clubs. Cindy must follow suit and play a Club. However, Cindy is out of Clubs. She has the 2, 3, and 7 of Spades as well as the 4 and 8 of Hearts. Hearts is her shortest suit (three Spades and two Hearts). Therefore, she must play a Heart, of any rank. She plays the 4 of Hearts.

★6A) Must Follow / May Beat / IYCFY Must Highest

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Must Highest: If a follow player does not have a card in hand that matches led suit, they must play their highest ranked card. If there are multiple cards with the highest rank, they may pick which card to play.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Example (1 High, Spades Trump): Cindy leads the 3 of Clubs. Sarah must follow suit and play a Club. However, Sarah is out of Clubs. She has the 4, 5, and 9 of Spades as well as the 1, 7, and 8 of Diamonds. The 1 of Diamonds is her highest ranked card. Therefore, Sarah must play the 1 of Diamonds.

★7A) Can't Lead Lowest / Must Follow / May Beat

Can't Lead Lowest: When leading, the lead player cannot lead the trick with their lowest ranked card, unless it is their only remaining rank.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Example (9 High): Demetri is leading the trick. He has the 2, 3, and 7 of Diamonds as well as the 2, 6, and 7 of Clubs. The 2 of Diamonds and 2 of Clubs are his lowest ranked cards. Therefore, Demetri cannot lead either of those cards. He decides to lead the 3 of Diamonds.

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

★8A) Can't Lead Hearts / Must Follow / May Beat

Can't Lead Hearts: When leading, the lead player cannot lead the trick with any card from the Hearts suit, unless it is their only remaining suit.

Example: Cindy is leading the trick. She has the 8 and 9 of Hearts as well as the 4 of Spades. She cannot lead either Heart card, so Cindy leads the 4 of Spades.

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

9A) Must Follow / May Beat / IYCFY Must Lowest

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Must Lowest: If a follow player does not have a card in hand that matches led suit, they must play their lowest ranked card. If there are multiple cards with the lowest rank, they may pick which card to play.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Example (1 High, Spades Trump): Cindy leads the 3 of Clubs. Sarah must follow suit and play a Club. However, Sarah is out of Clubs. She has the 4, 5, and 9 of Spades as well as the 1, 7, and 8 of Diamonds. The 9 of Spades is her lowest ranked card. Therefore, Sarah must play the 9 of Spades.

10A) Must Not Follow

Must Not Follow: Follow players cannot play a card that matches a suit currently in the trick. If they only have cards of the suit(s) that are in the trick, they must play any card in hand face down. It will not win the trick, but it will be captured by the trick winner. The highest played rank, regardless of led suit, wins the trick. If there is a tie for highest rank, the later one played wins.

When using this research card, there is no trump suit...even if the research card from Deck C has a trump suit listed! It changes to No Trump.

Example (9 High, ~~Diamonds Trump~~ No Trump): Demetri leads the 9 of Spades. Cindy must not follow suit by playing any Club, Diamond, or Heart. Cindy plays the 3 of Hearts. Sarah must not follow suit by playing any Club or Diamond. Sarah plays the 9 of Clubs. Demetri's 9 of Spades and Sarah's 9 of Clubs are the highest ranked cards in the trick. However, Sarah's card was played later. Therefore, hers is the highest and she wins the trick.

11A) Must Follow / Must Sequence

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

Must Sequence: Follow players must play a card that is 1 rank higher or 1 rank lower than the card played directly before them. If there are multiple options, they may choose which one to play.

In other words, if you can follow led suit and sequence you Must Follow and Must Sequence. If you cannot sequence, you still Must Follow. If you cannot follow but can sequence, you still Must Sequence. If you cannot do either, you can play anything.

Example (9 High, No Trump): Sarah leads with the 5 of Hearts. Demetri must follow suit and play a Heart. Additionally, Demetri must sequence which means he must play the 4 or 6 of Hearts, if he has either one.

Demetri has the 3, 7, and 8 of Hearts as well as the 4 and 9 of Clubs. Even though Demetri has the 4 of Clubs (which would sequence off Sarah's 5) he must follow suit first and foremost. He cannot sequence with the cards he has in the Heart suit. Therefore, he can play any Heart card he has. Demetri plays the 7 of Hearts.

It is now Cindy's turn and she must follow suit and play a Heart. Additionally, Cindy must sequence (off of Demetri's 7) which means she must play the 6 or 8 of Hearts, if she has either one.

Cindy does not have any Hearts. Instead, she has the 1, 3, 6, and 7 of Diamonds as well as the 8 of Spades. Because Cindy cannot follow the led suit, she must play any other suit. However, she must sequence and must play a 6 or 8 of any suit, if she has one. She has the 6 of Diamonds and the 8 of Spades. She may play either card, so she decides to play the 6 of Diamonds.

12A) Must Follow / Must Not Sequence

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

Must Not Sequence: Follow players must play a card that is 2+ ranks higher or 2+ ranks lower than the card played directly before them. If there are multiple options, they may choose which one to play.

In other words, if you can follow led suit and not sequence you Must Follow and Must Not Sequence. If you can follow but can only sequence, you still Must Follow. If you cannot follow and cannot sequence, you still Must Not Sequence. If you cannot follow and must sequence, you can play whatever card makes you sequence.

Example (9 High, Clubs Trump): Sarah leads with the 5 of Hearts. Demetri must follow suit and play a Heart. Additionally, Demetri must not sequence which means he must play the 3 of Hearts and lower or the 7 of Hearts and higher, if he has one. Demetri has the 4 and 6 of Hearts as well as the 9 of Clubs. Demetri cannot play the 9 of Clubs because he can still follow the led suit. Demetri normally would not be able to play the 4 or 6 of Hearts as those would make him sequence off of the 5. However, those are the only cards he has in the led suit and he must follow first and foremost. Therefore, Demetri can play either card. Demetri plays the 6 of Hearts. Cindy is up next. She must follow Hearts and must not sequence of the 6 of Hearts.

13A) Must Follow / Must Lose

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

Must Lose: Follow players must play a card that is weaker than the strongest card in the trick, if possible. This means if a follow player cannot follow the led suit, they cannot play the trump suit, unless it is their only remaining suit.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Example (1 High, Hearts Trump): Cindy leads with the 5 of Clubs. Sarah must follow suit and play a Club. Additionally, Sarah must play a 6 of Clubs or lower, if she has one. Sarah has the 2 and 4 of Clubs as well as the 7 of Diamonds. Even though the 7 of Diamonds is weaker, Sarah cannot play it because she must follow suit first and foremost. Both the 2 and 4 of Clubs are stronger than the 5 of Clubs. Because Sarah cannot Must Lose, she may play either card. She plays the 2 of Clubs. Demetri is next and he does not have any Clubs (led suit). Instead he has the 2, 3, and 6 of Spades as well as the 9 of Hearts. The 9 of Hearts is a lower rank, but is a stronger card (trump suit). Therefore, Demetri must play one of his Spades because they are all weaker than the 2 of Clubs (Sarah's card, which is currently the strongest card in the trick). He plays the 3 of Spades.

14A) Must Lead Long OR Low / Must Follow / May Beat

Must Lead Longest OR Lowest: When leading, the lead player must lead the trick with either any card from their longest suit or their lowest ranked card. If there are multiple options, they may choose which one to play.

Pay close attention to the current card ranking!

- If 9 is High, 9 is the highest rank and 1 is the lowest rank.

- If 1 is High, 1 is the highest rank and 9 is the lowest rank.

Example (1 High, Clubs Trump): Demetri has the 2, 3, and 7 of Hearts, the 5 and 8 of Spades, the 2 of Diamonds, and the 8 of Clubs. Demetri's options for leading the trick are any Heart card (longest suit), the 8 of Spades (lowest rank), or 8 of Clubs (lowest rank). He cannot lead any other card. Demetri leads with the 8 of Clubs.

Must Follow: Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

15A) Must Follow / May Beat / Must Play Twice

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Must Play Twice: After all players have played a card into the trick, starting with the lead player and going clockwise, each player will play a second card into the trick. Players Must Follow and May Beat with the second card.

After all players have played two cards, each player should add up the value of their two cards. All led suit cards are worth their printed value. All trump suit cards are worth two times their printed value. All off-suit cards are valued at 0, regardless of their printed value. The player with the highest value wins the trick and captures all played cards.

If there is a tie for highest value, the highest valued trump suit card wins. If there is no trump card in the trick, the highest valued led suit card wins.

When using this research card, 9 is always the highest rank...even if the research card from Deck C has 1 High listed! It changes to 9 High.

Example (1 High, 9 High, Spades Trump): Cindy leads the 3 of Clubs. Sarah follows with a 5 of Clubs. Demetri follows with the 9 of Clubs.

It is Cindy's turn to play again and she must follow Clubs, but she is out of Clubs. Therefore she can play any card, so she plays the 6 of Spades. Sarah is also out of Clubs and plays the 3 of Hearts. Demetri still has Clubs, so he follows suit by playing the 6 of Clubs.

Cindy has a total value of 15: 3 of Clubs + 12 (6 of Spades x2, Spades is trump)

Sarah has a total value of 5: 5 of Clubs + 0 (3 of Hearts is 0, it is off-suit)

Demetri has a total value of 15: 9 of Clubs + 6 of Clubs

Cindy and Demetri tied for the highest value. Cindy played the highest valued trump card, so she wins the trick.

16A) Must Follow / May Beat / Rainbows Cancel Trick

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Rainbows Cancel Trick: If all three cards played in the trick are different suits, the trick is cancelled (no one wins the trick). Discard all played cards and the player that lead the previous trick leads the next one.

Example (9 High, Hearts Trump): Demetri leads the 8 of Hearts. Cindy must follow suit and play a Heart. However, Cindy is out of Hearts and plays the 3 of Diamonds. Sarah is next and must follow by playing a Heart. She is also out of Hearts and plays the 7 of Clubs. There are three suits in the trick (8 of Hearts, 3 of Diamonds, and 7 of Clubs), so it is cancelled. The cards are discarded and Demetri leads the next trick.

17A) Must Follow / May Beat / Trick Can't Exceed 18

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Trick Can't Exceed 18 Value: The follow players cannot play a card that would cause the value of all cards in the trick to go above 18. All cards are equal to their printed value, regardless of suit.

If they only have cards in hand that would cause this to happen, they may play any card from their hand face down. Face down cards cannot win the trick, but will be captured by the trick winner. **Face down cards can be looked at by the trick winner before placing them in their trick piles!**

Example (9 High, Spades Trump): Sarah leads the 5 of Clubs. Demetri must follow suit and play a Club. He plays the 8 of Clubs. The current value of all cards in the trick is 13. Cindy is next and must follow by playing a Club. Additionally, she must play a 5 or lower to make sure the total value stays at 18 or lower.

Cindy has the 6, 7, and 9 of Clubs as well as the 4 of Spades. Cindy cannot play the 4 of Spades because she has Clubs and must follow suit first and foremost. All three of her Clubs will cause the total value to exceed 18. Therefore, Cindy can play any of her Clubs into the trick face down. She plays the 7 of Clubs. Demetri wins the trick and can look at Cindy's card before capturing all cards in the trick. Sarah is not allowed to look at Cindy's card since she did not win the trick.

18A) Must Follow / May Beat / Value = 18 Cancels Trick

Must Follow: The lead player may play any card from their hand. Each follow player must play a card that matches the suit played by the lead player, if possible.

May Beat: Follow players may play a card that is stronger or weaker than the strongest card in the trick.

Total Value = 18 Cancels Trick: If all three cards played in the trick cause the total value of all cards to equal exactly 18, the trick is cancelled (no one wins the trick). Discard all played cards and the player that lead the previous trick leads the next one. All cards are equal to their printed value, regardless of suit.

If all three cards have any other value, the trick will resolve normally.

Example (1 High, No Trump): Demetri leads the 4 of Diamonds. Cindy must follow suit and play a Diamond. Cindy plays the 8 of Diamonds. The current value of all cards in the trick is 12.

Sarah is next and must follow by playing a Diamond. Sarah has the 5, 6, and 9 of Diamonds. She plays the 6 of Diamonds. The total value of all three suits in the trick equals exactly 18 (4 of Diamonds, 8 of Diamonds, and 6 of Diamonds), so it is cancelled. The cards are discarded and Demetri leads the next trick.

Q) Hey Ryan, why did you choose 18 as the value on those last two cards?

A) Mary Shelley's Frankenstein was published in 1818, that's why!

Deck B - Objective

PC = Positive Contract / NC = Negative Contract (used for tie breaker)

★1B) Win Tricks ^{PC}

Objective: Win as many tricks as possible

Record in 'Objective Total': The number of tricks you won

You want to have the most amount of tricks compared to the other players.

Example: Demetri won 6 tricks, Cindy won 3 tricks, and Sarah won 9 tricks. Sarah scores +3 results, Demetri scores +1 result, and Cindy scores -1 result.

★2B) Avoid Tricks ^{NC}

Objective: Avoid winning as many tricks as possible

Record in 'Objective Total': The number of tricks you won

You want to have the least amount of tricks compared to the other players.

Example: Demetri won 2 tricks, Cindy won 0 tricks, and Sarah won 5 tricks. Cindy scores +3 results, Demetri scores +1 result, and Sarah scores -1 result.

★3B) Win 4 Tricks ^{NC}

Objective: Win exactly four (4) tricks

Record in 'Objective Total': The difference in the number of tricks you won from 4

You want to be the closest to 4 trick wins compared to the other players.

Example: Demetri won 4 tricks (difference of 0), Cindy won 1 trick (difference of 3), and Sarah won 8 tricks (difference of 4). Demetri scores +3 results, Cindy scores +1 result, and Sarah scores -1 result.

★4B) Win The Last 6 Tricks ^{PC}

Objective: Win as many of the last six (6) tricks as possible

Record in 'Objective Total': The number of tricks you won during the last 6 tricks

You want to have the most amount of tricks compared to the other players.

During the first 6 tricks of the hand, if the experimenter wins a trick they must discard it as it will not count towards scoring.

Example: Demetri won 3 of the last 6 tricks, Cindy won 3 of the last 6 tricks, and Sarah won 5 of the last 6 tricks. Sarah scores +3 results, Demetri and Cindy score +0 results.

★5B) Capture Card Points ^{PC}

Objective: Capture as many card points as possible

Record in 'Objective Total': The number of card points you captured

You want to have the most amount of card points compared to the other players.

Reminder: The 3-7 in each suit are the card points. 25 card points in each suit, total of 100 card points in the deck.

Example: Demetri captured 38 card points, Cindy captured 76 card points, and Sarah captured 50 card points. Cindy scores +3 results, Sarah scores +1 results, Demetri scores -1 results.

★6B) Avoid Card Points ^{NC}

Objective: Avoid capturing as many card points as possible

Record in 'Objective Total': The number of card points you captured

You want to have the least amount of card points compared to the other players.

Reminder: The 3-7 in each suit are the card points. 25 card points in each suit, total of 100 card points in the deck.

Example: Demetri captured 8 card points, Cindy captured 35 card points, and Sarah captured 37 card points. Demetri scores +3 results, Cindy scores +1 results, Sarah scores -1 results.

★7B) Capture 45 Card Points ^{NC}

Objective: Capture exactly 45 card points

Record in 'Objective Total': The difference in the number of card points you captured from 45

You want to be the closest to 45 card points compared to the other players.

Reminder: The 3-7 in each suit are the card points. 25 card points in each suit, total of 100 card points in the deck.

Example: Demetri captured 27 card points (difference of 18), Cindy captured 38 card points (difference of 7), and Sarah captured 62 card points (difference of 17). Cindy scores +3 results, Sarah scores +1 results, Demetri scores -1 results.

★8B) Avoid 1s, 2s, 8s, 9s ^{NC}

Objective: Avoid capturing as many of the 1s/2s/8s/9s as possible

Record in 'Objective Total': The number of 1s/2s/8s/9s you capture

You want to have the least amount of 1s/2s/8s/9s compared to the other players.

Example: Demetri captured 6, Cindy captured 0, and Sarah captured 4. Cindy scores +3 results, Sarah scores +1 results, Demetri scores -1 results.

9B) Win 1 Trick With Each Suit ^{PC}

Objective: Win exactly one (1) trick with as many suits as possible

Record in 'Objective Total': The number of suits you won exactly 1 trick with

You want the most amount of suits with 1 trick win compared to the other players.

- If you win 0 or 2+ tricks with a suit, it does not count towards your Objective Total.
- You always refer to the suit on the card you played/won with.
- When capturing cards, you may keep the card you win with face up to make it easier to track which suits you have won with.
- If you are using this objective with Card 15A, you choose which of the two cards you played to count as the suit you won with.

Gameplay Example (9 High, No Trump): Demetri is the experimenter. He leads the first trick with the 9 of Spades, Cindy plays the 2 of Spades, and Sarah plays the 8 of Spades.

Demetri won his first Spades trick (Clubs=0, Diamonds=0, Hearts=0, Spades=1)

Demetri leads the second trick with the 9 of Clubs, Cindy plays the 6 of Clubs, and Sarah plays the 7 of Clubs.

Demetri won his first Clubs trick (Clubs=1, Diamonds=0, Hearts=0, Spades=1)

Demetri leads the third trick with the 4 of Clubs, Cindy plays the 2 of Clubs, and Sarah plays the 1 of Clubs.

Demetri won his second Clubs trick (Clubs=2, Diamonds=0, Hearts=0, Spades=1)

This is bad for Demetri because he only wants 1 trick with each suit. Therefore, the Clubs suit will not score for him at the end of the hand.

Fast forward to the end of the hand, Demetri's trick wins for each suit look like this:
(Clubs=3, Diamonds=0, Hearts=1, Spades=1)

Demetri won 3 tricks with Clubs, 0 tricks with Diamonds, and 1 trick with Hearts and Spades. Demetri would write '2' in his Objective Total box for this experiment since he won exactly 1 trick with 2 suits.

Final Scoring Example: Demetri got 2 suits, Cindy got 3 suits, and Sarah got 0 suits. Cindy scores +3 results, Demetri scores +1 results, Sarah scores -1 results.

10B) Predict How Many Tricks You Will Win ^{NC}

Objective: Win as many tricks as you predicted

Record in 'Objective Total': The difference in the number of tricks you won from your prediction

You want to be the closest to your prediction compared to the other players.

- Before making your prediction, you must select card ranking and/or trump.
- Example: Demetri predicted 5 tricks and won 5 (difference of 0), Cindy predicted 7 tricks and won 3 (difference of 4), Sarah predicted 2 tricks and won 4 (difference of 2). Demetri scores +3 results, Sarah scores +1 results, Cindy scores -1 results.

11B) Predict How Many Card Points You Will Capture ^{NC}

Objective: Capture as many card points as you predicted

Record in 'Objective Total': The difference in the number of card points you captured from your prediction

You want to be the closest to your prediction compared to the other players.

- Before making your prediction, you must select card ranking and/or trump.
- Example: Demetri predicted 35 card points and captured 45 (difference of 10), Cindy predicted 44 card points and captured 28 (difference of 16), Sarah predicted 58 card points and captured 50 (difference of 8). Sarah scores +3 results, Demetri scores +1 results, Cindy scores -1 results.

12B) Win An Odd Number Of Tricks ^{PC}

Objective: Win as many tricks as possible...as long as it is an odd number

Record in 'Objective Total': The number of tricks you won if odd or 0 if even

You want the highest odd number of trick wins compared to the other players.

- If your total amount of trick wins is an odd (1, 3, 5, 7, 9, 11) number, you will write that number in your Objective Total.
- If your total amount of trick wins is an even (0, 2, 4, 6, 8, 10, 12) number, you will write a 0 in your Objective Total.

Example: Demetri won 5 tricks (he writes 5 in Objective Total), Cindy won 8 tricks (she writes 0 in Objective Total), Sarah won 3 tricks (she writes 3 in Objective Total). Demetri scores +3 results, Sarah scores +1 results, Cindy scores -1 results.

13B) Most Captured Suit - Least Captured Suit ^{PC}

Objective: Capture as many cards as possible in one suit and as few cards as possible in another suit

Record in 'Objective Total': The difference of your most captured suit from your least captured suit.

You want the highest difference compared to the other players.

- Capturing 0 cards in a suit will count as your least captured suit.
- Example: Demetri captured 6 Clubs, 4 Diamonds, 4 Hearts, 4 Spades. His most is 6 Clubs, his least is 4 Diamonds/Hearts/Spades (6-4=2), so he writes '2' in Objective Total.
- Cindy captured 1 Club, 6 Diamonds, 0 Hearts, 2 Spades. Her most is 6 Diamonds, her least is 0 Hearts (6-0=6), so she writes '6' in Objective Total.
- Sarah captured 0 Clubs, 3 Diamonds, 0 Hearts, 0 Spades. Her most is 3 Diamonds and least is 0 Clubs/Hearts/Spades (3-0=3), so she writes '3' in Objective Total.
- Cindy scores +3 results, Sarah scores +1 results, Demetri scores -1 results.

14B) Capture Unique Numbers ^{PC}

Objective: Capture as many different numbers (1-9) as possible

Record in 'Objective Total': The amount of unique numbers you captured

You want the highest amount of unique numbers compared to the other players.

- *When capturing cards during trick resolution, you **only collect the card you played and any cards that did not follow led suit (off-suit cards).***

- ***Pairs will cancel each other!** If you capture a number and you have already captured that number, you must discard both cards. **Important: You only discard the pair.** If you capture three of a number, you discard the pair and keep the third.*

Gameplay Example (9 High, Spades Trump): Cindy is the experimenter and leads the 9 of Spades. Sarah follows with the 2 of Spades. Demetri is out of Spades and plays the 3 of Hearts. Cindy wins the trick and captures the 9 of Spades (card she played) and the 3 of Hearts (off-suit card). The 2 of Spades (led suit) is discarded.

Cindy leads the next trick with the 8 of Spades. Sarah follows with the 5 of Spades and Demetri plays the 8 of Clubs. Cindy wins the trick and captures the 8 of Spades (card she played) and the 8 of Hearts (off-suit card). However, Cindy now has a pair of 8s, so she discards them along with the 5 of Spades (led suit).

Final Scoring Example: Demetri captured 3 unique numbers, Cindy captured 4 unique numbers, and Sarah captured 6 unique numbers.

Sarah scores +3 results, Cindy scores +1 results, Demetri scores -1 results.

15B) Predict How Many Trick Wins, Clockwise Player ^{NC}

Objective: Have the player who is sitting clockwise from you win as many tricks as you predicted

Record in 'Objective Total': The difference in the number of tricks they won from your prediction

You want to be the closest to your prediction compared to the other players. **You must reveal your prediction after the sixth trick is resolved!**

- *Before making your prediction, you must first select card ranking and/or trump.*

- *After making those selections, you must announce one of the four suits. **The clockwise player must tell you have cards they have in that suit.** They should not tell you the values on those cards and they should not tell you about any other suit. Simply the amount of cards they have in the announced suit!*

- *Once the above steps are completed, **secretly** write your prediction down. You may look at your prediction throughout the round, but **do not reveal it to the other players until after the sixth trick is resolved.***

Example: Demetri predicted Cindy would win 5 tricks and she won 3 (difference of 2), Cindy predicted Sarah would win 2 tricks and she won 5 (difference of 3), Sarah predicted Demetri would win 0 tricks and he won 1 (difference of 1). Sarah scores +3 results, Demetri scores +1 results, Cindy scores -1 results.

16B) Capture Card Points, Tricks 4-6 & Tricks 10-12 ^{PC}

Objective: Capture the most amount of card points during tricks 4, 5, 6, 10, 11, and 12

Record in 'Objective Total': The number of card points you captured during those specific tricks

You want to have the most amount of card points compared to the other players.

During tricks 1-3 and 7-9 of the hand, if the experimenter wins a trick they must discard it as those captured cards will not count towards scoring.

Example: Demetri captured 25 card points, Cindy captured 6 card points, and Sarah captured 40 card points. Sarah scores +3 results, Demetri scores +1 results, Cindy scores -1 results.

17B) Trick Win Difference w/Counter Clockwise Player ^{NC}

Objective: Have your trick win difference be as far away as possible from the player sitting counter clockwise from you

Record in 'Objective Total': The difference in the number of tricks you win from the number of tricks they win

You want to have the largest win difference compared to the other players. This win difference can be from you winning a lot of tricks and them winning none or vice versa.

- *Before selecting the other player, you must first select card ranking and/or trump.*

- *After making those selections, you must announce one of the four suits. **The clockwise player must tell you have cards they have in that suit.** They should not tell you the values on those cards and they should not tell you about any other suit. Simply the amount of cards they have in the announced suit!*

- *Once the above steps are completed, **secretly** write your prediction down. You may look at your prediction throughout the round, but **do not reveal it to the other players until after the sixth trick is resolved.***

Example: Demetri predicted Cindy would win 5 tricks and she won 3 (difference of 2), Cindy predicted Sarah would win 2 tricks and she won 5 (difference of 3), Sarah predicted Demetri would win 0 tricks and he won 1 (difference of 1). Sarah scores +3 results, Demetri scores +1 results, Cindy scores -1 results.

18B) Most Trick Wins In A Row ^{PC}

Objective: Win as many tricks in a row as possible

Record in 'Objective Total': The largest number of tricks you win in a row

You want to have the most tricks in a row compared to the other players.

- *When winning tricks, keep the piles separated by stacks of tricks you won in a row.*

Example: Demetri won tricks #1/5/6/7/8/11/12 (largest: 4 tricks in a row), Cindy won tricks #1/2/3/6/7/9/10/11 (largest: 3 tricks in a row), Sarah won tricks #1/5/6/7/8/9 (largest: 5 tricks in a row). Sarah scores +3 results, Demetri scores +1 results, Cindy scores -1 results.

Deck C - Trump/Card Ranking

★1C) Pick Trump / 9 High

Pick Trump: You must pick one of the four suits to be the trump suit.

9 High: Card ranking will be *(High)* 9 8 7 6 5 4 3 2 1 *(Low)* all hand.

★2C) Pick Trump / 1 High

Pick Trump: You must pick one of the four suits to be the trump suit.

1 High: Card ranking will be *(High)* 1 2 3 4 5 6 7 8 9 *(Low)* all hand.

★3C) No Trump / 9 High

No Trump: There will be no trump suit.

9 High: Card ranking will be *(High)* 9 8 7 6 5 4 3 2 1 *(Low)* all hand.

★4C) No Trump / 1 High

No Trump: There will be no trump suit.

1 High: Card ranking will be *(High)* 1 2 3 4 5 6 7 8 9 *(Low)* all hand.

★5C) Hearts Trump / 9 High

Hearts Trump: The Hearts suit will be the trump suit.

9 High: Card ranking will be *(High)* 9 8 7 6 5 4 3 2 1 *(Low)* all hand.

★6C) Spades Trump / 1 High

Spades Trump: The Spades suit will be the trump suit.

1 High: Card ranking will be *(High)* 1 2 3 4 5 6 7 8 9 *(Low)* all hand.

★7C) No Trump / Gustav (6↑/6↓)

No Trump: There will be no trump suit.

Gustav: During the first six tricks, card ranking will be **9 High** or **1 High** (your choice). Then, during the last six tricks the ranking is the opposite of your choice.

Example: Demetri is the experimenter and chooses 9 High. So, for the first six tricks of the hand, 9 will be high. Then, for the last six tricks of the hand, 1 will be high.

★8C) No Trump / Slalom (1st↑/2nd↓/3rd↑/4th↓...)

No Trump: There will be no trump suit.

Slalom: The card ranking will start **9 High** or **1 High** (your choice). Then, the card ranking will switch after every trick.

Example: Cindy is the experimenter and chooses 1 High. So, the first trick 9 is high, second trick 1 is high, third trick 9 is high, forth trick 1 is high, and so on.

9C) No Trump / Bell Curve (1st-4th↑/5th-8th↓/9th-12th↑)

No Trump: There will be no trump suit.

Bell Curve: During the first four tricks, card ranking will be **9 High** or **1 High** (your choice). Then, during the next four tricks, the ranking is the opposite of your choice. Finally, during the last four tricks, the ranking will go back to your original choice.

Example: Sarah is the experimenter and chooses 9 High. So, for the first four tricks, 9 is high. Then, the next four tricks 1 will be high. And finally, the last four tricks 9 will be high again.

10C) Pick Trump / Pick Slalom, Bell Curve, or Gustav

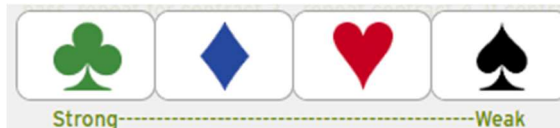

Pick Trump: You must pick one of the four suits to be the trump suit.

Pick Slalom, Bell Curve, or Gustav: You must pick one of the three options to dictate card ranking for the hand:

- **Slalom:** See 8C for more
- **Bell Curve:** See 9C for more
- **Gustav:** See 7C for more

11C) Trump Hierarchy / 9 High

Trump Hierarchy: Using the trump hierarchy cards, shuffle them together and place them face up in a row. The leftmost card is the strongest suit while the rightmost card is the weakest suit.

9 High: Card ranking will be *(High)* 9 8 7 6 5 4 3 2 1 *(Low)* all hand.

When a suit wins a trick, it is moved to the rightmost part of the row (it becomes the weakest suit). If it is already the weakest suit, nothing happens. *In the below example, the Diamonds suit won a trick and was moved to the rightmost space.*

12C) No Trump / 2nd Highest Wins / 9 High

No Trump: There will be no trump suit.

2nd Highest Wins: The 2nd highest card of the led suit wins the trick. If there is only one card of the led suit, the highest off-suit card is considered to be the 2nd highest (ties going to later played).

9 High: Card ranking will be *(High)* 9 8 7 6 5 4 3 2 1 *(Low)* all hand.

13C) No Trump / 8s Lose, Lead Next Trick / 1 High

No Trump: There will be no trump suit.

8s Always Lose, Lead Next Trick: If a player plays an 8, it cannot win and that player will lead the next trick. If multiple 8s are played, the later played 8 leads the next trick. If a player leads an 8 and the other players cannot follow the led suit, the highest card, regardless of suit wins the trick (ties going to later played). If all players play an 8 into the trick, the cards are discarded since no one wins.

1 High: Card ranking will be **(High) 1 2 3 4 5 6 7 8 9 (Low)** all hand.

14C) Clubs & Diamonds One Trump Suit / 9 High

Clubs & Diamonds One Trump Suit: Clubs and Diamonds are considered to be one suit for the purposes of Must Follow, Must Trump, etc. If someone leads a Club/Diamond, follow players must play a Club/Diamond.

9 High: Card ranking will be **(High) 9 8 7 6 5 4 3 2 1 (Low)** all hand.

All Clubs are stronger than all Diamonds. E.g. if the 8 of Diamonds is played, it can only be beaten by the 9 of Diamonds or the 1/2/3/4/5/6/7/8/9 of Clubs.

15C) 4s Trump / Choose 9 High or 1 High

4s Trump: All 4s are considered to be one suit for the purposes of Must Follow, Must Trump, etc. They no longer belong to their printed suit. However, their suit is used to determine their strength in the hierarchy.

Choose 9 or 1 High: You choose if the card ranking is **9 High** or **1 High** all hand.

Hierarchy: 4 of Clubs > 4 of Diamonds > 4 of Hearts > 4 of Spades. E.g. if the 4 of Diamonds is played, it can only be beaten by the 4 of Clubs.

- If a 4 is led, the follow players must play any 4 in their hand, if possible.

- A player may not play a 4 if they still have cards of the led suit!

Example (Must Follow, May Beat): Cindy leads with the 8 of Clubs. Sarah is next and has the 2, 4, 6, and 7 of Clubs. Sarah cannot play the 4 of Clubs, because it is not part of the Clubs suit. It's part of the trump suit. Sarah can only play the 2, 6, or 7 of Clubs.

16C) 9s & 8s Trump / 9 High

9s & 8s Trump: All 9s and 8s are considered to be one suit for the purposes of Must Follow, Must Trump, etc. They no longer belong to their printed suit. However, their suit is used to determine their strength in the hierarchy.

9 High: Card ranking will be **(High) 9 8 7 6 5 4 3 2 1 (Low)** all hand.

Hierarchy: 9 of Clubs > 9 of Diamonds > 9 of Hearts > 9 of Spades > 8 of Clubs > 8 of Diamonds > 8 of Hearts > 8 of Spades. E.g. if the 8 of Diamonds is played, it can only be beaten by the 8 of Clubs or a 9 of Clubs/Diamonds/Hearts/Spades.

- If a 9/8 is led, the follow players must play any 9/8 in their hand, if possible.

- A player may not play a 9/8 if they still have cards of the led suit!

Example (Must Follow, May Beat): Cindy leads with the 5 of Clubs. Sarah is next and has the 1 and 9 of Clubs. Sarah cannot play the 9 of Clubs, because it is not part of the Clubs suit. It's part of the trump suit. Sarah can only play the 1 of Clubs.

17C) Pick A Number Trump / Choose 9 High or 1 High

Pick A Number Trump: Pick a number 1-9. That number (#) becomes the trump suit. All cards of that number are considered to be one suit for the purposes of Must Follow, Must Trump, etc. They no longer belong to their printed suit. However, their suit is used to determine their strength in the hierarchy.

Choose 9 or 1 High: You choose if the card ranking is **9 High** or **1 High** all hand.

Hierarchy: # of Clubs > # of Diamonds > # of Hearts > # of Spades. E.g. if the # picked is 2 and the 2 of Diamonds is played, it can only be beaten by the 2 of Clubs.

- If a # is led, the follow players must play any # in their hand, if possible.

- A player may not play a # if they still have cards of the led suit!

Example (Must Follow, Must Beat, Must Trump, 2 Is Trump): Cindy leads with the 8 of Clubs. Sarah is next and does not have any Clubs. She has the 1, 4, 6, and 7 of Diamonds as well as the 2 of Clubs (this is not part of the Club Suit, it is part of the Trump Suit). Sarah cannot play any of her Diamonds, because she Must Trump. Therefore, she must play the 2 of Clubs.

18C) Off Suit, That Suit Is Temporarily Trump / 1 High

Off Suit → Trump: If a follow player cannot follow the led suit, the suit they play temporarily becomes the trump suit for the trick. This can happen twice in a single trick (the first follow player cannot follow led and plays a suit, the second follow player cannot follow led and plays a different suit). After the trick resolves, the next trick will not have a trump suit until another card is played off-suit again.

1 High: Card ranking will be **(High) 1 2 3 4 5 6 7 8 9 (Low)** all hand.

Example: Cindy leads with the 2 of Hearts. Sarah is next but does not have any Hearts. She plays the 5 of Diamonds. All Diamonds are temporarily the trump suit for this trick. However, Demetri is also out of Hearts and plays the 9 of Clubs. All Clubs are now temporarily the trump suit for this trick.

Demetri wins the trick and leads the next one. He plays the 1 of Spades. Cindy follows with the 3 of Spades. Sarah follows with the 8 of Spades.

Demetri wins again and leads the next trick. He plays the 2 of Spades. Cindy follows with the 5 of Spades. Sarah is out of Spades and plays the 8 of Hearts. All Hearts are temporarily the trump suit for this trick. Sarah wins the trick.
